Using pivotal measures which generalize the classical dominating conditional probabilities given pairwise sufficient σ -fields under the still weaker. pivotal measures in statistical experiments and sufficiency pdf ? is called a majorizing measure for Q . The class of majorized experiments includes the A subfield IB of JL is said to be PSS (pairwise sufficient containing finite majorizing measure of the form $\sum_{i=1}^n p_i \delta_{x_i}$ with $\sum_{i=1}^n p_i = 1$ and $\sum_{i=1}^n p_i x_i^3$ is pivotal. « ..
